

A problem with the listing of double formula on a food prescription occurs when a food prescription was previously entered and a change in formula is requested. A new food prescription is created for the new formula. The new formula appears in the new food prescription and is added to future prescriptions, along with the formula which was previously there. If this is not caught, double issuance of formula may occur.

A screen shot of this is shown below:

Food Prescription	Food Prescription for Certification
08/19/2011	16 - QUART(S) WHOLE MILK 1 - 4 CANS (16-14 OZ) BEANS (LEGUMES) 1 - DOZEN LARGE WHITE EGGS 36 - OUNCES WIC APPROVED BREAKFAST CEREAL 2 - 64 OZ PLASTIC BOTTLE(S) OR 12 OZ FROZEN WIC JUICE 600 - FRUIT AND VEGETABLE BENEFIT 2 - 16 OZ WIC WHOLE GRAIN CHOICE
02/19/2011	3 - 8 OZ BOX(S) BEECH-NUT OR GERBER INFANT CEREAL 7 - 12.9 OZ CAN(S) POWDERED SIMILAC ADVANCE EARLYSHIELD 24 - 13 OZ CAN(S) CONCENTRATED SIMILAC ADVANCE EARLYSHIELD 32 - 4 OZ JAR(S) BEECH-NUT OR GERBER FRUITS AND/OR VEGETABLES
12/19/2010	10 - 12.9 OZ CAN(S) POWDERED SIMILAC ADVANCE EARLYSHIELD 34 - 13 OZ CAN(S) CONCENTRATED SIMILAC ADVANCE EARLYSHIELD
09/28/2010	31 - 13 OZ CAN(S) CONCENTRATED SIMILAC ADVANCE EARLYSHIELD
09/19/2010	
09/13/2010	

This participant was originally on powdered Similac Advance. A new prescription for concentrated Similac Advance was created on 9/28/10. Future food prescriptions now contain the full amount of both the powdered and the concentrated formula. Future food prescriptions must be modified to remove the powdered formula.

Just another reason to always preview benefits before they are printed and have the participant preview them after they are printed!
